

FEATURES & BENEFITS

RAPID BANDER®
Sustainable Load Containment System

The RAPID BANDER® Sustainable Load Containment System is designed to reduce the economic and environmental costs associated with properly protecting hard-to-handle shipments. These include products that are heavy, unsteady, valuable, or costly to remediate in the event of load failures. Relevant applications include boxes, bottles, buckets, pails, drums, cans, sacks, and bags.

How The Rapid Bander System Better Protects Your Products, Your Profits, and Your Planet:

Functional Advantages

- Uses 2 rolls of RAPID FILM® Ultra Strength Stretch Film to form a high strength, laminated wrapping web that is resistant to punctures, tears and web breaks.
- Maximizes film stretch to prevent load shifting during transit.
- 2 to 3 times greater load containment without crushing products.
- Bands tie and secure products to the pallet to help eliminate load shifting.
- Partially unwrapped pallets retain containment strength.

Processing Advantages

- Reinforced wrapping web resists tears and punctures.
- 2 to 4 times more pallets wrapped between roll changeovers.
- Fewer wraps equals greater throughput/productivity and less equipment wear & tear.
- High clarity film makes loads easy to identify and inspect.

The superior strength of Rapid Film provides a high strength wrapping web that resists punctures, tears and breaks.

Rapid Bander significantly reduces per pallet film costs, stretch film use and greenhouse gas generation.

Film Needed to Wrap a Pallet

Rapid Film®

3.4 oz.

Standard LLDPE

7.3 oz.

Economic Advantages

- Reduces per pallet stretch film costs by 25% or more, with no capital investment.
- Reduces product and cleanup costs associated with load failures. This can be especially critical for frozen and refrigerated products.
- Reduces costs of product replacement, freight, missed delivery dates, lost customers.

Environmental Advantages

- Reduces per pallet stretch film usage by 40% to 60%.
- Reduces per pallet wrapping greenhouse gas emissions by at least 40%.
- Rapid Film is recyclable into bags, sacks, and other film applications.

Service Advantages

- Rapid Bander devices are maintained and serviced at absolutely no cost to you.
- The Rapid Bander commitment includes free ongoing System Performance Audits to maintain load containment and cost standards.
- Service and repairs can also be performed on your existing equipment, at reasonable prices.

SUPERIOR PROTECTION FOR YOUR PRODUCTS.
YOUR PROFITS. YOUR PLANET.™

Ready To Learn More?

We'd love to tell you more, answer any questions, and set up a trial in your facilities. That way, you can see for yourself how Rapid Bander® can enhance your supply chain sustainability efforts by reducing load failures, along with reducing your economic and environmental costs.
